(54) Title: GOLF PUTTING ALIGNMENT SYSTEM

(57) Abstract: A putting system using an alignment mark (2) on the top of a shaft in relation to the centerline mark (3) on the putter head. A golf putting alignment system that has a putter, which has the shaft (1) attached to the head of the putter between the centerline mark (3) and the toe (4) of the putter. The putter head is now closer to the golfer making it easier for the golfer to get over a putt. The shaft (1) is at an acute angle to the heel position and extends directly over the length of putter head in direction away from the toe. Attaching the shaft in this position causes the shaft to extend back over putter head, thus crossing the centerline mark (3) on the head. An alignment mark (2) is placed on the shaft directly over the position the shaft crosses the centerline mark (3). The golfer lines the putter's face (6) square to the desired path the ball is to travel. The golfer then aligns the alignment mark (2) on the shaft to the centerline mark (3) on the head, the putter head becomes square to the target line and brings the golfer's eyes perpendicular over the putt as it should be.
